

ABHAY KUMAR SINGH

MANUFACTURING & OPERATIONAL EXCELLENCE PROFESSIONAL | 16+ YEARS |
OPEX, LEAN SIX SIGMA, PRODUCTIVITY, AUTOMATION,
MES & DIGITAL MANUFACTURING

OEE Excellence • Productivity improvement • Cost Optimization • Delivery Performance • COPQ Reduction

PROFESSIONAL SUMMARY

Manufacturing and Operational Excellence professional with 16+ years spanning hands-on production, shop-floor operations, industrial engineering, automation, maintenance, and continuous improvement. Built a high-volume automotive manufacturing foundation before assuming stronger Continuous Improvement responsibilities from 2023 and Manufacturing Excellence responsibilities in 2025. Applies OEE and loss analysis, Time Study, Work Measurement, MOST, ECRS, line balancing, Lean, TPM, Six Sigma, root cause analysis, and manufacturing analytics to improve productivity, quality, cost, delivery, and safety. Experienced in SAP/MES visibility, Power BI dashboards, automation, and structured shop-floor management across automotive, electronics/ATM assembly, and industrial manufacturing.

STRATEGIC FOCUS AREAS & IMPACT

OEE & Productivity Excellence
OEE loss elimination, Time Study, Work Measurement, cycle-time analysis, line balancing and shop-floor improvement.

Digital Manufacturing & Intelligence
SAP/MES visibility, Power BI dashboards, digital loss intelligence and KPI systems for faster decisions.

Lean, TPM & Kaizen
Lean, TPM, Six Sigma, 5S, SMED, RCA, 4M, 5 Why, 8D and CAPA to reduce losses.

Cross-Industry Transferability
Automotive depth plus ATM assembly-line Kaizen and electronics/assembly exposure.

KEY ACHIEVEMENTS DASHBOARD

33.3% Censafe Output	**60→80** Output improved Boxes/Shift	**20%** Press Shop OEE	**₹23L+** Achieved Additional cost Savings in Weld Shop
25% CT reduced in Assembly shop	**15%** COPQ Reduced	**100+** (Engineers & operators) Trained	**15%** CT reduced in CNC

CORE COMPETENCIES

Manufacturing & Operations
- Manufacturing Excellence
- Operational Excellence / OPEX
- Production Excellence
- Shop-Floor Management
- Industrial Engineering
- Productivity Improvement
- Capacity Optimization

Lean & Continuous Improvement
- Lean Manufacturing
- Six Sigma Black Belt
- Kaizen, TPM, SMED, VSM
- Loss Elimination
- RCA, 4M, 5 Why, 8D
- CAPA and Defect Prevention

Digital Manufacturing
- MES and SAP PP/MM
- Power BI KPI Dashboards
- Manufacturing Analytics
- Digital Loss Intelligence
- Production Traceability
- Industry 4.0 Initiatives

PROFESSIONAL EXPERIENCE

Nash India Industries Ltd | Chennai May 2025 – Present
Assistant Manager Manufacturing Excellence

- Own the site Manufacturing Excellence charter, reporting to the Plant Head and Corporate AVP – OPEX and coordinating priorities across production and support functions.
- Drive Lean, TPM, Six Sigma, OEE improvement, loss analysis, and digital performance management across productivity, quality, cost, delivery, and shop-floor control.
- **Increased Censafe output from 60 to 80 boxes per shift—approximately 33.3%—through Time Study, Work Measurement, and process analysis.**
- Applied Lean and MOST with the DN team during the Shingi Kaizen event to optimize a proposed NPD ATM assembly layout for movement, waiting, and ergonomics.
- Developed SAP/MES- and Power BI-linked KPI and loss dashboards for OEE/OLE review, WIP visibility, loss analysis, and faster decisions.
- Applied defect analytics, SPC, zero-defect campaigns, and structured RCA to support COPQ reduction.
- Institutionalized 5Q Daily Work Management, visual takt boards, and escalation routines to improve accountability and issue closure.

KEY METRICS: 33.3% Censafe productivity improvement | 60 → 80 boxes/shift | 20% OEE improvement | 15% COPQ reduction | 40% faster decisions | 100% safety compliance

Steel Strips Wheels Ltd | Chennai & Jamshedpur Apr 2015 – Apr 2025
Senior Engineer – Production & Automation

- Led high-volume press-shop and robotic weld-shop operations for major automotive OEM programs across throughput, quality, delivery, safety, and automation.
- Coordinated 100+ operators, supervisors, and engineers across 15+ production lines.
- Reduced cycle time by 15% through time study, line balancing, bottleneck removal, process optimization, and automation improvement.
- Engineered Fanuc auto-fixture logic, increasing throughput by 12%.
- Implemented MES-enabled WIP visibility and dashboards, improving production-planning accuracy by 20%.
- Led 8D and 4M analysis, reducing weld rework by 15% and delivering ₹8 lakh annual scrap savings.
- Applied predictive-maintenance analysis and planning, improving uptime by 14%.

KEY METRICS: 15% Cycle time reduction | 12% throughput increase | 14% uptime improvement | ₹8 lakh annual scrap savings

New Vishal Engineering | Jamshedpur Dec 2012 – Mar 2015
Electrical Maintenance Engineer

- Reduced critical machine failures by 30% through preventive-maintenance discipline, breakdown analysis, and corrective-action follow-through.
- Executed electrical-panel modernization and energy audits, improving operating efficiency by 12%.
- Standardized electrical troubleshooting protocols, reducing downtime by 18%.
- Developed preventive-maintenance schedules and tracking systems for 50+ machines, strengthening reliability control and maintenance visibility.

The 3 Guys Network / Alliance Telecom 2010 – Nov 2012
Project Engineer – Telecom Infrastructure

- Delivered 20+ multi-site telecom infrastructure rollouts on schedule and within budget.
- Coordinated 12+ vendors and contractors while maintaining stated quality and safety requirements.
- Managed concurrent-site execution, scheduling, progress control, and stakeholder coordination.

KEY PROJECTS & INITIATIVES

Censafe Time Study & Productivity Improvement — Completed
Increased output from 60 to 80 boxes per shift (approximately 33.3%) through Time Study, Work Measurement, and process analysis.

Shingi Kaizen Event – Nash Dabaspet — NPD/Kaizen Contribution
Supported a new ATM production-line design under NPD with the DN team, applying Lean and MOST-based analysis to optimize the proposed assembly layout for lower material movement and waiting, with improved operator ergonomics.

Digital Loss Intelligence Platform — Digital Improvement Initiative
Developed an SAP/MES-linked downtime and loss-intelligence system for visibility and faster response; stated 25% response-time result requires validation.

Real-Time Manufacturing Intelligence Dashboard — Digital Improvement Initiative
Built a Power BI KPI cockpit for real-time performance review and faster decisions; stated 40% decision-speed result requires validation.

SKILLS

ERP & Manufacturing Systems
SAP, Manufacturing Execution Systems (MES), production planning systems, shop-floor reporting platforms, PLC troubleshooting

Data Analytics & Visualization
Power BI, Advanced Excel, Excel VBA/Macros, SQL, KPI dashboards, SPC analytics, manufacturing analytics

Automation & Robotics
Fanuc/Yaskawa robot programming & Handling, industrial automation.

Digital Manufacturing & Industry 4.0
Smart manufacturing, real-time production monitoring, digital KPI systems, manufacturing intelligence, predictive maintenance analytics & Equipment Reliability.

Programming & Analytics
Python, C, C++, Embedded C, SQL, Minitab, control charts, Pareto analysis, FMEA, Cp/Cpk

Quality & Reliability
SPC, FMEA, COPQ, defect reduction, CAPA.

EDUCATION & CERTIFICATIONS

EDUCATION

B. Tech (from college of engg. BPUT)
Electronics & Telecommunication Engineering | 2010

PROFESSIONAL CERTIFICATIONS

✓ *Lean Six Sigma Black Belt*
SixSigmaOnline (Educate 360) | 2025

✓ *Lean Six Sigma Green Belt*
Aveta Business Institute | 2019

✓ *Advanced Excel Certification*
2023
